

## Perfection Architectural Systems appointed to assist in a \$58 million school project

by [Abeni Okeke](#) on August 7th 2011 and filled under [Architecture & Interiors](#)

Perfection Architectural Systems ([www.perfectionarch.com](http://www.perfectionarch.com)), a leader in engineered canopy solutions, is pleased to have contracted with Willis A. Smith Construction to complete Booker High School's reconstruction project in Sarasota, Florida. The \$58-million project encompasses a comprehensive design for a new school, five new buildings, and major renovations to five other buildings. Because of ongoing growth in the student body, a more accommodating cafeteria and media center will be constructed. The centerpiece of the project will be a two-story main classroom building that will be sectioned off into specific "communities", providing educational opportunities for students with similar interests such as technology or science. Perfection Architectural Systems was selected for the project to assemble various aluminum structures on the high school premises. The following are the additions Perfection will provide:

- A 4,500 square foot dining area in the school's courtyard
- A large courtyard canopy that will run through the interior of the campus and join to all of the major buildings, creating an environment where students and faculty feel more "connected".
- An architectural sunshade canopy that will be located at the entrance of the new VPA Theatre.
- A new bus loop canopy and separate parent pick-up canopy on opposite sides of the campus that will provide shade and protection from the weather for students waiting to be picked up.

"We are looking forward to working with Willis A. Smith Construction to rebuild campus pride in the Sarasota community," says Rob Jones, Business Development Manager for Perfection Architectural Systems. "Contributing to the new state-of-the-art developments at Booker High School is very exciting".

A ceremony for the two-year project's start commenced on January 26th, 2011. The scheduled year of completion is 2013. In addition to the project making traveling around campus easier, the project will also enhance campus security. Construction will focus on a central courtyard to enable the school staff to monitor campus activities and any visitor access.

About Perfection Architectural Systems, Inc. Perfection Architectural Systems is a privately held manufacturing company with headquarters in Orlando, Florida. Founded in 1993, Perfection's dedicated employees have worked diligently to continue the tradition of excellent workmanship and personalized service. In September 2002, they upgraded their manufacturing plant to a state of the art 61,000 square foot facility to better serve their growing customer base. The same year they added sun control devices to complement their aluminum walkway cover division. In 1995, they recognized an increasing need for local service across the nation and added their first Certified Dealer Representative in Charlotte, North Carolina. Today, they have over 12 Certified Dealer Representatives covering 22 states and now serve all of the Southeastern United States, The Eastern Seaboard, The Gulf Coast, and several states in the Midwest.
